269-469-5687 • www.centeroftheworld.net • info@centeroftheworld.net

MADE BY HAND, LOCALLY

Choose your wood & stain

Our cabinets are available in a variety of domestic hardwoods: cherry, maple, walnut, quarter-sawn white oak, red oak, and hickory. Rustic, “character” and “wormy” options are also available. We offer a full range of stain colors. Visit our website for an interactive stain chart.

Choose your size

Many of the styles depicted in this catalog are available in multiple sizes. See price lists for details. If you don't see the size you need, let us know and we'll give you a price for the size of your choice.

User-friendly finish

Our cabinets are finished with a conversion varnish that is water- and stain-resistant, and requires no polishing or waxing. You do, however, need to protect it from scratches and heat. On request, we also offer oil, wax, paint, and lacquer finishes. To clean, simply wipe with a soft dry or damp cloth, in the direction of the grain.

Our guarantee

Our furniture is designed and crafted to last for generations. We are confident in the quality of our wood products. Therefore, our warranty covers defects in workmanship and materials for two years. If a defect is found during that period, we will determine whether to repair or replace the item. If repair is deemed the best solution, Center of the World will determine whether the piece should be returned to our shop or another for repairs. Wood is a natural product that reacts to changes in humidity by expanding or contracting. If the environment is not controlled, seasonal gapping or minor checks can occur, and should be appreciated as a natural characteristic of solid wood. Indoor humidity levels in the range of 35-45% will minimize this. If furniture develops deep cracks, and humidity in the home is controlled, the item will be repaired at no cost. Customers should inspect furniture upon receipt and refuse delivery if a defect is discovered. If a defect is discovered later in the warranty period, the customer should return the piece for repair or replacement. Upon completion of the repair, Center of the World will return the item, at no expense to the customer.

Our commitment to the environment

We use sustainably harvested, local hardwoods, which have been endorsed by the USDA as a preferred green building material. Every year, we give away enough hardwood saplings to replace all of the wood used in our shop. We have been certified as a Green America Approved Business.

Our commitment to the community

Center of the World Woodshop has an active role in the community — we sponsor, support and organize numerous fund-raising events to support New Troy's Community Center, providing hundreds of staff hours and leadership every year since the Center's inception.

Personalize with inlays

Wood or glass inlays can make a true one-of-a-kind cabinet. Choose from one of our existing patterns, or let us design one for you.

Don't see what you want?

Let us design a something for you.

Terry Hanover has been designing custom furniture since 1976. Contact us to arrange an appointment (in person or by phone) to discuss your ideas and needs with him. Within a few days, you'll receive a design and quote.

Design fee \$75, payable in advance

Ready to place an order?

A 50% deposit will get us started, with the balance due on completion. Our turnaround is about 12 weeks, not including delivery.

Blanket-Wrapped* Shipping

We personally deliver to locations within a 100-mile radius of our southwest Michigan shop. For most other destinations within the continental United States, we contract with Ukay Furniture Delivery. Ukay trucks pass through our region every 2-3 weeks; time to delivery is 2-5 weeks (Montana, Wyoming, N. & S. Dakota, Nebraska, and Iowa are serviced less frequently). Delivery fees are determined by Ukay based on distance, value, and size of the shipment. When Ukay handles a delivery, our customers pay exactly what Ukay charges us. We do not profit from deliveries.

*Deliveries to Hawaii or Alaska must be crated.

Questions?

Contact us: 269-469-5687 or info@centeroftheworld.net

WOODS & STAINS

We use hardwoods that are sustainably harvested in our region of the country. Domestic hardwoods have been endorsed by the USDA as a preferred green building material, due to responsible harvesting methods practiced by the American hardwood industry, as well as minimal transportation requirements, particularly compared to imported woods.

Even though these are all considered hardwoods, they have a wide range of characteristics based on:

- **Hardness** — Woods are ranked according to their Janka Hardness Rating. This is a measure of the force required to embed a 0.444-in. steel ball 0.222-in. into the wood. The higher the Janka score, the harder the species.
- **Grain** — Some woods, such as oak and elm have a porous, highly textured grain that you can actually feel. Others, such as cherry and maple, have a closed, tight grain, giving a smooth look and feel.
- **Color** — Some woods have a very light or white grain, others are reddish or brown, some a mix.

About swelling, shrinking, and warping

Wood is a living material that will react to swings in temperature and humidity. To help prevent problems, we provide customers with a Furniture Care Guide that includes recommended humidity and temperature ranges. To minimize potential problems, read and follow our guidelines.

Before you ask to see stain samples

Visit the online interactive wood & stain color chart on our website. Then order sample(s) on the wood(s) of your choice (\$5 per sample)

269-469-5687

www.centeroftheworld.net

Gray Elm

Unique grain, varying from straight to a lively or wooly, almost herringbone-like texture. Depending on your choice of stain, gray elm can really pop with drama — for instance, when stained with Michaels Cherry. Without a stain, elm appears bland, so we don't recommend it.

Janka rating: 830

Brown Maple

Sometimes referred to as soft maple. About 25% softer than select hard maple, it takes a stain better than its harder cousin. A frequent choice of people who want a look similar to stained cherry, but without the higher cost.

Janka rating: 950

Cherry

Particularly beautiful, fine-grained, naturally orange-brown to mahogany. Sap wood (nearer to the bark) is much paler, increasing the wood's character. Cherry darkens as it ages, as a result of exposure to UV rays (think of the patina as cherry's suntan). Therefore, for the first few months of a cherry piece's life, we advise customers to avoid leaving anything on top for an extended period, as doing so could result in a light spot. If this happens, however, no worries. Simply remove the item that was blocking the light and the color will soon even out.

Janka rating: 950

Walnut

Stunningly beautiful, fine-grained, chocolate-brown, and relatively lightweight. The finest of hardwoods for furniture. We rarely choose to stain walnut, as the wood is naturally rich with color. Our most expensive wood.

Janka rating: 1010

Red Oak

Often referred to simply as "oak." Highly textured, with a wide, open, flowing grain. Run your hand across a finished red oak table and you can feel the grain. Very porous, so takes stain very well.

Janka rating: 1290

Quarter-Sawn White Oak

Naturally beige. Due to its porous nature, takes stain very well. Very dense, so heavy. Grain has outstanding wavy and ray-flake patterns. Resists rotting and warping, so is highly desirable in areas with high humidity. "Quarter-sawn" means the tree's growth rings are approximately perpendicular to the board's broad face, which is achieved by quartering the log before cutting it into boards. This specialized technique makes it a more expensive wood.

Janka rating: 1360

Select Maple

Also sometimes called "hard maple." Hard, dense, fine-grained, and light-colored. Highly valued for furniture and cutting boards. Extremely tight grain inhibits absorption of stains, so staining is not recommended. Best with a clear varnish, allowing the pristine beauty of the wood to shine. As it ages, will slowly deepen in color, from very pale to soft gold.

Janka rating: 1450

Hickory

Variegated color patterns run the gamut from near-white to dark brown. A stunning wood that requires a skilled eye and hand, as its wild changes in grain direction are extremely difficult to work with. A very hard wood.

Janka rating: 1820.
